THE death of M. PAUL BEET creates vacancy in Tonquin which the Franch Government will not find it easy to fill. When the distinguished statesman arrived to take up the reins of government as Resident-General he found an almost total absence of anything like organization in the services, and the whole country was in a state of anarchy. M. BEET was sent out to set things in order, and notwithstanding the impediments placed in his way by some of those from whom he had н right to expect assistance, he steadily and unwaveringly proceeded with the difficult task allotted to him. His administration was marked by firmness, justice, and kindness. Towards the natives his policy was one of conciliation, endeavouring to win their affection for France by giving them the materials for good government and showing a consistent respect for their sentiments and aspirations. Just at the moment when his work was beginning to bear fruit he has been cut down by the hand of death. The news the court and give his evidence in public, of the sad event will be received with profound regret by his fellow countrymen, who hand. Possibly, bowever, the election of Prince WALDEMAR to the Bulgarian and arrest Russian military movements. Let us take the case of the sessions held on Wednesday. Most of the S. D. No formal opposition to the granting of the icence was raised, but it appeared that the Rev. A. G. Goldsmirn bad endeavoured privately to influence the Justices against the applicant. Now, any attempt to privately charge of their duties is very much to be promptly repelled. The licensing Justices, bowever, do not seem to take this view, and Mr. Mittorell-Innes was even ready to read an anonymous letter he bud received if the other Justices had wished to hear it. Hon. A. P. I think, sir, this state of uncertainty is most unfair to you and at the same time highly prejudicial to the true interests of the Colony, and therefore I can assure you that it is quite as much to strengthen your own hands, because I think if you knew as a fact that you would continue as Administrator during the pres nt most important session, perhaps you mig at be inclined to take a different view of matters than you do at present, and it is, as I say, quite as much to strengthen your own hands as to satisfy a not unnatural impatience on the part of all sections of this community that I beg to put the following questions:-

Has any word been received as to whether Sir George Bowen will return to his post as Governor of the colony at the expiration of his leave on the 16th

that the matter should be dealt with by the Po-

But it was thought that if it was necessary to have recourse to the ordinary means of procedure this would be nugatory because the child would be removed before the return day of the summons or before ward and give evidence in an open Court, whereas they would be very willing to come and state | Then his Lordship says:-what they knew before the Registrar General. The second section states that the Registrar-General may associate with him in the inquiry of the system of child adoption and formestic service two or more Chinese Justices of the Peace or such other Chinese persons as may trom time to time be designated by the Governor; and if after due inquiry he is satisfied that the child is being trained as a prostitute it shall be lawful for the Registrar-General to make an order for the proper custody of the child, or if he should think fit to leave the child with the custodian he may require the latter to find security for the proper care and bringing up of the child. Now, the system of security has been worked for some time and it has been found to answer very well. There are now about two hundred children thus under security, and I believe the Registrar-General finds as a rule the conditions of the agreement are strictly carried out. The section as drafted leaves it optional whether the Remistrar-General should associate with bimself

two Chinese Justices of the Peace. In committee it might be considered whether this provision should not be made imperative upon the Registrar-General, and if the committee is of opinion that the change should be made there will be no objection on the part of the Government to make that change. The third section gives power to the Registrar-General to impose a line not excoading \$500 on any person not appearing and not producing such child. This is absolutely nocessary if we wish the system to work efficiently. The fourth section runs-" Whenever the Register-General shall have reason to believe that I any female child under the age of sixteen years has been purchased and brought into the Colony for the purpose of emigration, it shall be lawful for the Revistrat General to summon before him the custodian of the said child as provided for i by section L of this Ordinance, and to deal with the case and make such order for the proper of the case any require, and in case table said party shall refuse or neglect to offer the said summons, he shall be lights to the penalties mentioned in section 3."
